

Sept. 7 visit
Joseph Kelly to: rod

08/26/2011 02:51 PM

Rodney-

Thanks for taking a few minutes to talk to me this morning. As mentioned, I called because your site is part of the RCRA 2020 CA Universe. It became part of that universe as a result of the prior activities related to storage in the "Old Chrome Shop" and related cyanide-impacted soil cleanup. I'd like to conduct my inspection and obtain background information, with an overall goal of moving your site out of the 2020 Universe, if possible.

I believe the report I would like to locate is the August 30, 1996, Source Evaluation Report referenced in the attached letter. If you can find that report and make a copy, or send it to me if you find it later, that would be a great help. Also, any current/recent information, such as recent soil or groundwater data or information regarding surrounding groundwater use would be helpful. I'm not sure if you have any recent data, but environmental or waste sampling may have been performed on soils disposed in connection with the construction of the building addition (if applicable), although I'm not sure when that occurred.

Thanks in advance, and sorry for the inconvenience.
